

Wine cellar costs: US, Canada, UK and Australia

Compare published construction, wine room and equipment prices with their scope and exclusions.

Updated October 29, 2026

There is no useful single price for every custom wine room. Compare the work included before comparing the amount. The sources below were fetched on 2026-10-29. These are published examples, not quotes for a listed business or a ceiling on a luxury project.

Published prices by country

| Market | Published amount in local currency | What it covers | |---|---|---| | US | USD 15,000–60,000 | Fixr's national construction range, updated 2025-01-31. Its separate high-end example is USD 180,000. This is general cost guidance. | | Canada | CAD 3,142.50–10,942.50 across the named examples | Rosehill's displayed equipment prices for the CellarPro 1800XT HE and Recessed Ceiling Mount 6000. This is a cooling-equipment comparison, not a constructed room price. Both pages show sold-out text; confirm availability. | | UK | GBP 7,674–17,192 | Wine Corner's Freestanding Wine Room product range, as displayed on the product page. It is not a bespoke cellar construction range. Ask for delivery, assembly and VAT treatment in writing. | | Australia | From AUD 50,000 plus GST for a climate-controlled installation | Signature Cellars' Classic Cellars page. The same page starts racking-only work at AUD 20,000 plus GST. These are different scopes, not endpoints of a single range. |

For an Australian underground comparison, Signature Cellars lists starting prices of AUD 75,000 plus GST for its Original Spiral Cellar and AUD 80,000 plus GST for its White Cellar. Both examples use the depth stated on the source page. The work assumes a pre-excavated hole. Excavation and third-party costs such as planning, engineering and flooring are excluded. These are starting prices for distinct products, not a complete installed price band.

The Canadian prices use the CAD currency metadata on the product pages. No complete Canadian custom-room price range was established from these pages. Rosehill's custom cellar page says it provides individual quotes. Likewise, the UK product range does not establish a national bespoke build range. Get local proposals rather than converting a US range and calling it local market evidence.

Turn the brief into comparable quotes

Ask each vendor to separate design, survey, structure, enclosure, glazing, racking, cooling, electrical work, drainage, freight, approvals and tax. Identify the party doing each task. If another contractor supplies an excluded item, include that amount in your overall budget.

A large glass area, difficult delivery route or remote condenser can change the work. Ask the installer to price the actual layout. Do not choose cooling capacity from room volume or bottle count alone. WhisperKOOL's calculator asks about insulation and conditions outside the room

as well as its surfaces.

Keep the budget honest

Record currency and quotation date beside every amount. Separate a fixed price from an allowance. Ask how substitutions and variations are approved. Use the budget tool to add quoted items and your own contingency choice. It does not supply an assumed vendor price.

For Ireland, New Zealand, the UAE, Switzerland, Singapore and Hong Kong, this guide does not claim a verified local price range. Ask a provider serving the property for a scoped quote. Check import costs, local support and approval responsibilities before ordering equipment from another market.

Frequently asked questions

Are the published country prices comparable construction quotes?

No. The examples cover different scopes, including US construction guidance, Canadian cooling equipment, a UK room product and Australian installation starting prices. Compare currency, tax and exclusions before budgeting.
